25 June 1962**MEMORANDUM FOR: Deputy Director (Research)****SUBJECT: PI Visits to Missile Installations**

1. On the occasion of the recent Hyland Panel presentation to the USIB, General Estes commented that it would be desirable for NPIC PI's to visit U.S. missile installations to assist them in developing background for their work. [redacted] advised him at that time that our PI's had in fact periodically visited such installations.

2. Since the question has been raised, I am attaching two documents showing visits during the past two years by NPIC PI's to major U.S. installations of significant strategic intelligence interest. I believe you will find that these trips have been rather extensive. We hope to continue this program and, in the future, to add more PI's from the military services, as those shown on the attached list are basically from CIA.
